Ōvatus. P. Ovidius Naso, one of the most celebrated of the Roman poets, was born at Sulmo on the 20th March, B.C. 43, of a respectable equestrian family. He was intended by his father for the profession of the law, and actually held several judicial appointments; but the whole bent of his life was towards love and poetry. He was thrice married; his two first wives were speedily divorced, but towards the third—one of the Fabian family—and his daughter by her, Perilla, he seems to have felt a cordial affection. His mistress Corinna is also familiar to the readers of his amatory poems; and is identified by an ancient, though not altogether trustworthy authority, with Julia, the daughter of Augustus. In the year 8, A.D., a sudden misfortune befel Ovid, which coloured his whole subsequent life. He was banished by the emperor to a Thracian town called Tomi, on the banks of the Black Sea, and there died, after no less than twenty years' exile. The real offence which he had committed has been in vain sought for by the industry and conjectural sagacity of scholars; and in spite of many ingenious hypotheses must be considered as still unknown. The works of Ovid are very numerous, and include "Amorum Libri III.," a collection of erotic elegies; "Epistolarum Heroidum," in number 21; "Ars Amatoria," or "De Arte Amandi" in three books; "Metamorphoseon Libri XV.," "Fastorum Libri VI.," originally supposed to have consisted of twelve books; "Tristium Libri V.," elegies dating from his banishment; and several other less important poems. His tragedy, the "Medea," esteemed by some ancient critics the most perfect of his works, has perished. Ardour of passion, liveliness of fancy, and very great ease and facility of versification, are the chief characteristics of Ovid's poetry. But the very rapidity with which his verses were produced was often fatal to their polish; and his pages are often deformed by frigid comparisons and antithesis, which seem to anticipate a later and less tasteful school of poetry.

Persius. A. Persius Flaccus, a Roman satiric poet, whose works we still possess, was of equestrian rank, and born at Volaterra, Dec. 4th, A.D. 34. The events of his brief life are few and unimportant. He was educated in his native place up to the age of twelve, and afterwards at Rome, one of his teachers being the Stoic Cornutus. He died at the early age of twenty-eight, Nov. 24, A.D. 62. His works consist of six short satires, which have always enjoyed a very wide popularity. Though dramatic in spirit and expression, the style is deformed by many obsolete and unusual words; and the transitions are rapid and perplexing. The translations of Persius into the modern languages are very numerous.

Petrōnūs, C, is the name of a noble Roman, depicted in *Tacitus* as a favourite of *Neio*, and his chief companion and adviser in debauchery. He was *consul in A. D. 61*, and afterwards *governor of Bithynia*, but in 66, having lost the favour of the emperor, he avoided an almost certain fate by committing suicide. By many critics he is identified with the author of a work which has come down to us in a very corrupt and mutilated state, entitled "*Petrōnii Arbitri Satyricon*," which is a very lively exposure of the follies, extravagances, and vices of the early empire. From the nature of the subject, it contains many unusual expressions now difficult of interpretation, and the corruptness of the MSS has rendered some passages altogether unintelligible. Nor does the great humour of the piece compensate for its grossness and obscenity.

Plautus, T. Maccius, the most celebrated and most national of the Roman comic poets, was born about 254 *b.c.* at Sarsina, in Umbria. He came at an early age to Rome, and was there employed in various menial occupations, till his comic talent was so far developed as to enable him to rely upon literature alone for a support. His career was triumphant: he is said to have written 130 plays, and died in 184 *b.c.* at an advanced age. Even in the Augustan age, the authenticity of many plays ascribed to Plautus was doubtful, and Varro made a list of 21, with respect to which he considered no question could be raised. Of these, 20 have come down to us, and have not only been always popular with scholars, and frequently imitated in the modern stage, but have also kept a high place in the comic literature of the world. The foundation of the plot is often Greek, but the characters, with their action, language, and witisms, are thoroughly natural and Roman. The versification, though often rough, is always vigorous, and the Latinity singularly pure. The occasional coarseness with which the lines of Plautus are disfigured, may not unfairly be attributed to the taste of the audience for whom they were composed.

Plinius, — (i) C. Plinius Secundus, was born A. D. 23, probably at Coma. Of the events of his life we know but little. He came to Rome at an early age, there studied under the best teachers of the day, and afterwards served a campaign in Germany. About the end of Nero's reign, he was sent as procurator into Spain, and on his return

to Rome lived on terms of great intimacy with the emperors of the Flavian family. He perished, as is well known, in the eruption of Mount Vesuvius, A. D. 79, which destroyed Herculaneum and Pompeii, and which his scientific ardour had prompted him to observe too closely. Pliny was one of the most industrious of literary men, and the most indefatigable of compilers. This is very manifest in the only work which is now extant, the "Historia Naturalis" in thirty-seven books, dedicated to the emperor Titus. It is a very valuable repository of the physical science of the ancients, compiled with great industry, and expressed in a pure and masculine style. But the author has shown but little discrimination in the selection of his facts, with but few of which he was personally acquainted; nor did he accomplish any thing for science by the lucidity of his arrangement or the felicity of his generalizations. — (ii) C. Plinius Cæcilius Secundus, sister's son and adopted child of the preceding, was also born at Coma, A. D. 61. He was rich, learned, and went through the course of public magistracies then open to noble Romans. To us he is chiefly known by his Letters in ten books, which contain much information both as to himself and his contemporaries. His only other extant performance is the "Panegyricon," which is only a eulogy of the emperor Trajan. In this work the writings of both the Elder and the Younger Pliny are designated by the common abbreviation Pl.

Pollio, C. Asinius, cons. 40 a. c., the patron to whom Virgil addressed his fourth and eighth Eclogues, was born at Rome 76 b. c. He appears through life to have adhered to the party first of C. J. Caesar, and afterwards of Octavianus, and served with some distinction in the wars of those troubled times. But he is chiefly known to us as the magistrate and friend who restored his little patrimony to Virgil and protected Horace. His own works were numerous, comprising many orations and tragedies, as well as a History of the Civil War, in seventeen books. But now nothing is extant from his pen except three letters preserved in the correspondence of Cicero; and it is not impossible that the friendly partiality of the great poets whom he protected has exaggerated his literary merits.

Pompilius (i) Cn. Pompeius Magnus, cons. 70, 53, 52, one of the most celebrated of Roman generals, was born Sept. 30, b. c. 106. He made his first campaign under his father, who was cons. 89, in the Social War, and when only seventeen years of age, gave decided indications of his subsequent military ability. He at once adopted the party of Sulla, and rendered important services to that leader before his arrival from the East. His merits and talents were at once acknowledged by him together they prosecuted the war against the Marians with great success, and Pompey, having reduced Sicily, passed over to Africa, and there cruised Domitius Ahenobarbus, and changed the occupier of the Numidian throne. For these achievements he was saluted with the appellation *Magnus*, which he ever afterwards bore and transmitted to his children, and triumphed, though only a simple knight, in his 23d year. If Sulla had been a younger man, the result might have been a struggle for supremacy. But though the cordiality between the two was less marked than before, the latter, who was about to retire into private life, offered hardly any opposition to the schemes of Pompey, and died very shortly after. The next step in Pompey's rise was the command

in Spain against Sertorius, which he obtained at the end of the year 75. Here, for the first time, he met his match. The first campaign was decidedly to his disadvantage, and it was only after many alternations of success, that the assassination of the Spanish general, and the inefficiency of his lieutenant Perperna, assured the victory to Pompey. In 71, therefore, he again triumphed, though he had held as yet no curule office. The next year, 70, was that of his consulship, which he held in conjunction with Crassus. It was signalized by the repeal of two very important laws enacted by Sulla, involving the restoration of the tribunician power, and a change in the mode in which the judges were elected. After two years of repose, in which he took very little part in public business, Pompey prepared for his next great exploit, the war against the pirates, who at this time infested the Mediterranean Sea, with astonishing hardihood and success. To aid him in the accomplishing this object, very extraordinary powers were placed in his hands, by a law proposed by the tribune A. Gabinius, and carried only after the most strenuous opposition on the part of the aristocracy. The result was very striking. A very few months utterly extirpated an evil, against which all previous efforts had been fruitless. But the war with Mithridates still remained unfinished in the hands of Lucullus, and Pompey was anxious to earn fresh glory. The Manilian law, supported by Cæsar and Cicero, increased even the powers which Gabinius had been the means of conferring upon him. Lucullus was obliged to cede his army and his credit to his fortunate successor, and Pompey was again attended by his wonted good fortune. He completely defeated Mithridates and his allies, deposed the last Antiochus, made Syria a Roman province, and established the dominion of Rome in Phœnicia and Palestine. He once more triumphed with extraordinary splendour, in the year 61. We have now narrated the brightest portion of Pompey's life. He was naturally not fitted for civil contests, and had passed so much of his time in camp as to be inexperienced in the politics of the city. Cæsar, too, was at this time rising to the supremacy which he afterwards attained, and the realization of many of Pompey's wishes depended in great part upon his alliance. Accordingly, in the year 59 was formed the private compact between Pompey, Cæsar, and Crassus, known as the First Triumvirate, and which for a time rendered them all-powerful. But the apparent concord did not prevent the master mind of the three from imperceptibly, though surely, gaining the preeminence. Though Pompey and Crassus were again consuls in 55, and though the former used every means to sustain his popularity, it became every day more apparent that Cæsar was not only the favourite of the people, but practically the chief man in the state. At length, on his victorious return from Gaul, the struggle broke out, and Pompey was recognized as the chief of the senatorial party. It was then seen how insecure was the foundation of Pompey's popularity, and how completely the recollection of his services had been obliterated by the more recent exploits of his rival. The one could raise no troops even to defend the city; the other's progress through the cities of Italy was a triumphal procession. Pompey fled to Greece, and there soon succeeded in collecting a powerful army, in numbers superior, in discipline inferior, to that of Cæsar. The campaign, which took place in 48, was but brief. Pompey was unwillingly compelled by his followers to risk a pitched battle, and on the 9th of August was completely routed on the field of Pharsalia. He made no attempt to renew the war, but fled to Egypt, where he was assassinated on the 29th of September, though without the knowledge or complicity of Cæsar. He was 55 years of age. — (n.) Cn. Pompeius Magnus — Sex.

Pompeius Magnus, the sons of the preceding, continued the war against Cæsar for some time after their father's death. Cæsar perished soon after the battle of Munda (*vid. Cæsar*), but Sextus prolonged the struggle for some years, with some success, especially at sea. In the year 36 he was, however, finally defeated by Octavianus, and was not long after taken prisoner, and put to death.

R, r, the seventeenth letter of the Latin alphabet, corresponds with the Greek Rho (Ρ, ρ). On account of the aspirate which always accompanies the Greek letter, we find it represented by *rh* in some words derived from that language. Originally the letters *r* and *s* seem to have been interchangeable to a great extent, as may be seen in the various terminations, *arbor, arbos*; *honor, honos*; *quæso for quæro*; *hesternus*, from *heri*; *ustum* from *uro*, etc. It is also assimilated with *l*, as in the diminutive *libellus* from *liber*, in *intelligo* from *inter-lego*, etc. For abbreviations in which *l* is used *vid.* Table of Abbreviations.

Sālūstus. *C.* Sallustius Crispus, the celebrated historian, was born at Amiternum in the year 86 *b.c.* and, having been quaestor, filled the office of tribune of the people in 52. In 50 he was ejected from the senate by the censors, it is said on the ground of adultery; but in 47, being praetor elect, was of course restored to that dignity. He went with Caesar to the African campaign of 46, and was appointed by him governor of Numidia, an office which he administered to the great advantage of his own private fortune. He died in the year 34. The extant works of Sallust consist of two short historical books; one narrating the war against Jugurtha; the other detailing the Catilinarian conspiracy. His style is concise and vigorous, though sometimes obscure, and affecting the use of obsolete words. The tradition of antiquity represents his personal character in a very unfavourable light, which, however, is not confirmed by any of the positive facts in our possession.

Scipio -ōnis, m. a staff, wand, sceptre, P. Ct; — *eburneus*, L, carried before triumphant generals.

Scipio, the name of a patrician family belonging to the Gens Cornelia. We shall mention, (1.) P. Cornelius Scipio, cons. b.c. 218; was, during his consulship, opposed to Hannibal in his Italian campaign; defeated by that general, and severely wounded in a battle near the river Ticinus. From the following year 217 to 211, Scipio and his brother Cneius carried on the war in Spain against Hasdrubal. Their success appears to have been various; but finally, in the year 211, their armies were destroyed, and both the generals perished. — (11.) P. Cornelius Scipio Africanus Major, son of the above, born 234 b.c., cons. 205, 194, cens. 199, is said to have begun his splendid career by saving his father's life at the battle of the Ticinus. He was a tribune of the soldiers at the fatal defeat of Cannæ, and, after the battle, assumed with Appius Claudius the command of the routed army. In 210 he was elected to fill the place of his father and uncle, who had fallen in Spain, and proceeded thither with a proconsular commission. In three years, not only by his military skill, but by the moderation of his conduct to the Spaniards, he succeeded in completely destroying the Carthaginian ascendancy in that country, and returned to Rome in 206, to be unanimously elected consul for the ensuing year. His plan, which after a time he induced the senate to allow him to execute, was to carry the war into Africa. He landed not far from Utica, in 204, there passed the winter in a fortified camp, and in the spring of the ensuing year gained such successes as to induce the Carthaginians to recall Hannibal from Italy. A decisive battle took place near Zama, in October, 202, and Scipio was completely victorious. In 201, a treaty was signed concluding the war, and the Roman general returned to Italy in triumph. He made no ill use of his extraordi-

nary power and popularity, and declined many of the honours which the people wished to confer upon him. He was censor 193, a second time consul in 194, and had the title of princeps senatus formally bestowed upon him in many succeeding censorships. In 190, Africanus, in order to advance the interests of his brother L. Scipio, who was then consul, offered to serve as legatus under him in the war against Antiochus. He was once more successful; but on his return to Rome, he was formally accused, at the instigation of M. Porcius Cato, of having received bribes from the enemy. He disdained to answer the charge, but detailed in a long and eloquent speech, in which he engaged in his behalf the sympathies of all his hearers, his services to the state, and immediately retired to his country-seat. He never returned to Rome, and died at Liternum about the year 185.—(III.) P. Cornelius Scipio Æmilianus Africanus Minor, son of L. Æmilius Paullus, the conqueror of Macedonia, and adopted son of P. Scipio, eldest son of the great Africanus; born about 185, cons. 147, 134, cens. 142. He first distinguished himself in the war in Spain, where he served as military tribune in 151, in which capacity also he went to Africa on the breaking out of the third Punic war in 149. In 147 he was elected consul, with the sole command against Carthage; and the city was taken and burnt in the spring of the following year, while its conqueror returned to Rome in triumph, having amply earned the surname Africanus, which he had inherited. In 142 he was censor, and in 134 was again elected consul, in order that he might take the management of the war in Spain. The heroic defence and capture of Numantia form the principal incidents of this campaign. The rest of Scipio's life was spent in a civic struggle against his brothers-in-law the Græci, and their intended reforms. He incurred the popular hatred by the vigour with which he espoused the aristocratic cause, and is said to have been murdered by some of his political opponents. It is certain that his death, which was sudden, was attended by many suspicious circumstances. The younger Scipio was remarkable among his contemporaries by his devotion to literature; he was the friend of the Greek historian Polybius, who accompanied him in all his campaigns, and is recorded to have been on familiar terms with Lucilius and Terence.—*Subst.* Scipiades -æ, m. a descendant of the Scipios, a Scipio, Lc. Sēneca. (1.) M. Annæus Seneca, a rhetorician of the Augustan age, born at Corduba in Spain, but who passed many years of his life at Rome. Some portions of his rhetorical works are still extant and printed with the remains of his more celebrated son. They possess but little value. — (II.) L. Annæus Seneca, son of the foregoing, was also born at Corduba, in the reign of Augustus, but for the most part lived and died at Rome. He is politically known as the tutor of Nero, to whose cruelty and ingratitude he finally fell a victim, being compelled to commit suicide A.D. 65. The crimes of the pupil have cast an unfavourable shade over the character of the preceptor; and there is certainly a strong contrast between the Stoic principles professed by Seneca and the great splendour of his mode of life. His works, which are chiefly philosophical, are written in a pointed and vigorous but somewhat affected style, and distinguished by the practical character as well as justness of the thoughts expressed. He is also supposed to be the author of ten extant tragedies, which do not show any great degree of poetic or dramatic power.

Stātus, P. Papinius Statius, an Epic poet, the son of a celebrated grammarian of the same name, was born in the first half of the first century, A.D. But beyond that he rose to great fame, and was especially renowned as an improvisator, we know hardly any thing of his life. His extant works are, "Silvarum Libri V." a collection of thirty-two

miscellaneous pieces, "Thebaldos Libri XII," an epic poem on the expedition of the Seven against Thebes; and an unfinished epic, "Achilleidos Libri II." Statius is often considered to rank next to Virgil among the Roman heroic poets. We find in his works a remarkable uniformity of excellence, few blemishes, a great correctness of taste, and at the same time an absence of those beauties which are the product only of true poetic genius.

Süctönus C. Suetonius Tranquillus, was probably born about A.D. 70, and appears to have followed the profession of the law, and to have held an office in the household of the emperor Hadrian. He is best known to us as the author of the Lives of the Cæsars—a work which contains much private and personal information as to the first emperors, and has usually been considered as a trustworthy historical authority. His style is plain, concise, and not unfrequently obscure.

Sulla (*frequently written Sylla*), a surname in the Gens Cornelia. The celebrated man who bore it, L. Cornelius Sulla Felix, born 138 B.C., cons. 88, dict. 82, cens. 80, was the son of a father whose birth was more respectable than his means were ample. He appears, however, to have received a good education, for he was distinguished throughout life by a love of Greek literature, as well as by the profligacy which the severer Romans, like Cato, were accustomed to stigmatize as Greek. He showed at an early age considerable military talent, and served under Marius, whose jealousy he frequently excited (*vid.* Marius) in the Jugurthine War, and in that against the Cimbri and Teutones. The enmity between the two celebrated rivals first broke out into a flame in the contest for the command against Mithridates, and Sulla, who was legally appointed to the coveted post, was compelled to take up arms against Marius, and to vindicate his rights in civil war. The latter, by whom conduct so unprecedented was not expected, was easily expelled the city, and Sulla, using his victory with moderation, proceeded to the scene of the war in Asia. While for four years he was successfully employed in the contest with Mithridates, the party of Marius was triumphant at Rome, and inflicted the severest penalties upon their political opponents. Nevertheless Sulla, secure in the affections of his veterans, bided the time of his revenge, and did not return to Italy till he had concluded an honourable peace with Mithridates. But when in the spring of the year 83 he landed at Brundisium, his politic arts and his warlike talents soon rendered him triumphant over the powerful coalition which opposed him; and with the exception of Sertorius, who for some time prolonged the war in Spain, the Marian party was irretrievably crushed. A bloody revenge followed. Sulla assumed the title of dictator, and exercised a supreme and irresponsible authority in the state; the adherents of Marius perished in the wide-spread proscription, and every precaution which relentless cruelty could suggest and put in practice was adopted to destroy the popular party. To this end the celebrated Leges Corneliae, or Sullan Reforms, as they are sometimes called, were directed. It is impossible here to enter into a specification of their provisions; it is enough to say, that they were all intended to restore to the senate and patricians generally their old preponderance in the commonwealth. In the year 79 Sulla, weary of politics, and anxious to indulge a naturally voluptuous nature, resigned the dictatorship, and retired into private life. He died in 78, in the 60th year of his age, having occupied part at least of his brief period of repose in the composition of his own memoirs, in twenty-two books, a work which has unfortunately not descended to modern times. He was buried with great pomp at the public expense.—*Adj.* Sullanus -a -um, C.

Tāctus, *C. Cornelius*, the celebrated historian of the early empire, was about the same age as the younger Pliny (*vid.* Plinius), and his intimate friend. We know little of his life, except that he was prætor A.D. 88, consul 97, and that in 77 he married the daughter of Cn. Julius Agricola. He is supposed to have been still alive in the year 117, but the date of his death is quite uncertain. Among his contemporaries he enjoyed considerable reputation as a public speaker. To us he is known as the author of two works on the history of Rome under the empires, "Historia" and "Annales," a treatise "On the Manners of the Germans," and a life of his father-in-law, Agricola. The spirit of truth and honesty, manifest in these works, insensibly inspires a respect for the author's character, and a confidence in his statements, while the great knowledge of human nature which he displays, and the dramatic form into which his materials are thrown, render them attractive to readers who are able to encounter the difficulties of a style, which, though always pregnant and forcible, is frequently obscure. The subjects of the "Germania" and the "Agricola" render them especially interesting to English students.

Tērentius. P. *Terentius* Afer, the author of six comedies still extant, which have been translated and imitated in almost every language of modern Europe, was a native of Carthage, and born about the year 195. We know but little of his life, except that at a very early age he was sold as a slave to P. Terentius Lucanus, and, according to custom adopted on manumission the family name of his master. His literary success procured him the friendship of many of the highest among the Roman aristocracy, and it was even maliciously said that Scipio and Lælius were the real authors of his plays. He died in the 36th year of his age, while on a journey to Greece. The plays of Terence differ widely from those of Plautus, in belonging to what is now called "genteel comedy," and it was, perhaps, by comparison with those of his predecessor, that they were censured by ancient critics as deficient in comic force. The fault is one which a modern reader is not ready to acknowledge; and it is singular, that though a foreigner and a freedman, Terence is universally allowed to have displayed a greater correctness of language than any Latin author, except Cicero and Cæsar. The plots of his comedies were all taken from Menander.

Tiberius -ii, *m.* a common Roman praenomen, abbreviated *Ti.* The person best known by this name alone is the second emperor of Rome, Tiberius Claudius Nero Caesar. He was the son of T. Claudius Nero by Livia, who afterwards married Augustus, and received the empire in consequence of his adoption by his step-father. He was born 16th November, *b.c.* 42, and died 16th March, *a.d.* 37, having reigned upwards of twenty-two years. It is impossible, in this place, to give even a brief epitome of his life. He was well educated, and possessed refined literary tastes. Morally, he displays the usual detrimental effects of irresponsible power upon the character. He was selfish, hypocritical, and cruel; not without political ability, but deficient in resolution, and addicted to the most obscene pleasures. At the same time, the length of his reign is sufficient to show that he was far from displaying the outrageous vice and cruelty of some of his successors.

Tibullus, Albius, a Roman elegiac poet, who flourished in the half century immediately preceding the Christian era, and died, at an early age, about the same time as Virgil. He was of equestrian rank, and passed much of his life on the family estate at Pedum, between Tibur and Praeneste. He appears to have accompanied his patron, Valerius Messala, in a campaign into Gaul, in the year 30 B.C. Of the four books of Elegies extant under the name of Tibullus, only the two first are indisputably genuine. They are remarkable for the purity of taste which they exhibit, and for a tender and graceful strain of pathos.

Titus -i, m. a common Roman praenomen, usually abbreviated T. The person generally known by this name only is the emperor Titus Flavius Sabrinus Vespasianus, son and successor of the emperor Vespasian. He was born A.D. 40, received a liberal education, and in the year 70 distinguished himself by the capture of Jerusalem, and the successful termination of the Jewish War. It is said that, as a youth, his disposition gave little promise of his future excellence. His reign, which only lasted from 79 to 81, was marked by an equity, moderation, and benevolence to which the Roman people was little accustomed in their rulers. He was succeeded by his brother Domitian, who was believed by many to have been necessary to his death.

Tullius, Servius, the sixth king of Rome, whose reign, though barren of warlike traditions, was marked by three important events—the enlargement of the boundary of the city, the formation of a Latin league, at the head of which was Rome, and the establishment of a constitution which gave considerable political importance to the plebs. Many scholars consider that the reign of Servius Tullius represents a period of Latin supremacy at Rome. Hence *Tullianum -i*, *n.* the lowest part of the Roman state prison, said to have been built by Servius Tullius

Varro, a surname in the Gens Terentia; (i.) M. Terentius Varro, the most learned of the Romans, was born B.C. 116, and died B.C. 23. Although, like most Romans, he served in more than one campaign, the life of Varro was chiefly passed in literary pursuits. He himself says that he was the author of 400 books, only one of which has come down to modern times in a complete state. This is the "De Re Rustici Libri XII," a very valuable treatise on practical agriculture. Of another work, "De Lingua Latina," originally in 24 books, six books have been preserved in a corrupt and mutilated condition. The great work of Varro, a very voluminous treatise on antiquities, has irretrievably perished. (ii.) P. Terentius Varro Atacinus, a Latin poet, of the first century B.C., whose works

have not descended to us, but who is mentioned in terms of praise by various authors.

Vespasian. T. Flavius Vespasianus Sabinus, the first of the Flavian emperors, was born A.D. 9, of a family of low rank. His military talents were the foundation of his future fortune. He served with distinction in Germany and Britain, and on the breaking out of the Jewish war was selected by Nero to suppress it: he was still engaged in Palest-

tine, when Galba died, and the contest began between Otho and Vitellius. In 69, Vespasian was himself proclaimed emperor at Alexandria, and in the course of a year or two established himself at Rome. His reign, which lasted till the year 70, was prosperous. The emperor's private character was respectable, his mode of government not severe; and the parsimony with which he was often reproached, did not prevent the expenditure of large sums of money on useful and ornamental works of peace.

Virgîdēmā -m, f. a rod-harvest, i. e. a good beating, P.

Virgilius. P. Virgilius Maro, the most celebrated of the Roman epic poets, was born at Andes, a small village near Mantua, B.C. 70, of a respectable though not affluent family. His works are sufficient evidence of his learned education; and we are told by his biographers that he was instructed by Greek philosophers and grammarians. He was the intimate friend of Augustus and Mæcenas, as well as of Horace and the other celebrated authors of his day, and appears, during the greater part of his life, to have been in easy circumstances. He died at Naples in the year 19, having never enjoyed very robust health. The principal works of Virgil are a collection of ten Pastoral Poems or Eclogues; a poem on Agriculture, the Georgics, in four books; and an epic poem, the Æneid, in twelve books, the last named of which is said never to have received the finishing touches of its author. They are all distinguished by the same qualities, great good taste, most melodious versification, and great skill in handling the multifarious materials supplied by his discursive antiquarian knowledge. At the same time it must be acknowledged that the fire of original genius is sometimes wanting, and that the utmost art does not compensate for the absence of the native vigour which animates the artless poetry of Homer.

Vitellîus, Aulus, a Roman emperor who succeeded Otho, was born of a distinguished though not ancient family, A.D. 15. Like many other imperial debauchees, he was not without literary tastes, but it was his vices which rendered him a congenial companion of Tiberius, Caligula, Claudius, and Nero. His reign lasted little less than a year, and was marked only by the prodigality which he displayed in gratifying his sensual pleasures. His power soon crumbled away before so powerful an adversary as Vespasian, and he was

slain in the same year, A.D. 69, as he had ascended the throne.

CASSELL'S

ENGLISH-LATIN DICTIONARY.

PREFACE

TO THE ENGLISH-LATIN DICTIONARY.

THE aim in the English-Latin part of this Dictionary has been, to present a Latin equivalent for every English word and phrase now in current use. In selecting the vocabulary for that purpose, the authority of the best actual usage, rather than that of any English Dictionary, has been followed; for there is no English Dictionary that does not either omit many words that are in use, or give many words that are not in use. Of course the current English of the nineteenth century covers a much wider space than the Latin of the days of Cicero and Augustus. Hence it became necessary to borrow from inferior writers, as well as to seek assistance from analogy. In having recourse to these aids, care has been taken, by the use of certain signs, the exact meaning of which is explained, to distinguish between pure Latinity and less pure Latinity. It is believed that by the plan pursued the student will not only be preserved from the danger, to which he is constantly exposed in most English-Latin Dictionaries, of confounding even modern adaptations with ancient and pure Latin words and idioms, but will find himself possessed, to some extent, of a scale of Latin values, or a means of ascertaining the exact authority of each particular form of speech. In order to make this system of tests complete, it is necessary here to add, that in cases left without a specific mark or sign, the word or phrase is to be accounted, if not Ciceronian, yet of an authority approaching to that of Cicero. With the view of conveying the largest amount of instruction compatible with the limits assigned to a work so low in price, compression and abbreviation have been fully studied, and it is believed that the Dictionary will serve as a Phrase Book, and in a measure a Book of Synonyms, while it answers the ordinary purposes of a Dictionary. To collect and arrange the materials which enter into this English-Latin Dictionary would be the labour of many years, if not of a life, nor could the matter be presented in a perfect form by any one hand. No such Herculean task has been

PREFACE TO THE ENGLISH-LATIN DICTIONARY.

attempted, but that which ought to prove more useful to the student, namely, to present in an English dress the most important of the mass of materials accumulated and set in order by the best scholarship of Germany. Special use has been made of the German-Latin part of Dr. Georges' most excellent Lexicon, the title of which is appended, with that of other authorities which have been consulted or laid under contribution in the composition of this work. While making his acknowledgments the writer must not forget the assistance rendered by William Orges, Esq., Ph.D., of the universities of Leipsic and Berlin, a scholar now resident in this city, and less known than he deserves to be.

ABA

ABL

A, or **An**, has no representative in Latin, for the Latin has no article; only the context, therefore, can determine whether in translating from Latin into English a noun should have any article, and, if any, whether the definite or indefinite; and on the other hand, in translating from English into Latin, you must drop the article, whether it be the definite "the" or the indefinite "a." If, however, our "a" is used for "one," then it may be represented by *unus*, e.g. *ad unum omnes*, all to a man. **A**, when used distributively, may be rendered by *in* with the accusative, as *duodena describit in singulos homines jugera*, he distributes twelve acres a man; also with the ablative to denote time, *ter in anno*, thrice a year. As a preposition, "a" may be expressed by the supine, as *ire renatum*, to go a fishing. Mere apposition expresses our indefinite article, e.g. *Crassus, optimus orator*, Crassus, an excellent orator; *Mithridates odio in Romanos Hannibal*, Mithridates was in hatred against the Romans a (second) Hannibal. See **One**.

Abast, **Ast**, as a noun, *puppis*; as an adverb, *a tergo*, a puppi; *prora et puppis*, fore and aft; *a fronte atque a tergo*, adv.
